

TO FIND SONGS ON [WWW.DOCTORUKE.COM](http://www.doctoruke.com)

**Go to the opening (index) page.
<https://www.doctoruke.com>**

The “SONGS” section has a list of all the songs (more than 4,000) on my site, in alphabetical order. If you’re looking for a particular song, you can look through the list, and/or enter the title in the search box near the top of the page.

The “2 PAGE MEDLEYS” section has 500 medleys of 2 or more songs, put together for added interest and added length of the songs.

The “SONG CATEGORIES” section has over 200 categories, where you can look for songs by particular artists, songs from different eras, or songs of different genres (country, folk, show tunes, novelty songs, etc)

Please note: You must choose songs that have an “s” following the title. (most will have the “s”) If the song does not have the “s”, it is simply a chart without an audio player.
