Intro:   

Love is all about chemistry, isn't something you go off to school to learn

Isn't math or ancient history, it's the kind of thing that comes down to simple terms

It's not about you, it's not about me. Love is all about we,

Want to take you to that great unknown, show you to a place you've never been

Down a road where only lovers go. But before we leave, I wanna repeat again

It's not about you, and it's not about me. Love is all about we,
p.2. We

With a string you can tie a knot, but you gotta have somethin' to tie it to

Otherwise all you've got is a knot, but when it ties me to you, it's a whole other thing

'Cause love is all about we,

Love is not about young or old, touches everybody in a special way

It's a blanket when the nights are cold, it can even keep you dry on a rainy day

And it's not about you, it's not about me. Love is all about we,

With a string you can tie a knot, but you gotta have somethin' to tie it to

Otherwise all you've got is a knot, but when it ties me to you, it's a whole other thing

'Cause love is all about we,
